

ADA DTI DATA ENGINEER JOURNEY

Experience through
Collaboration and Productivity

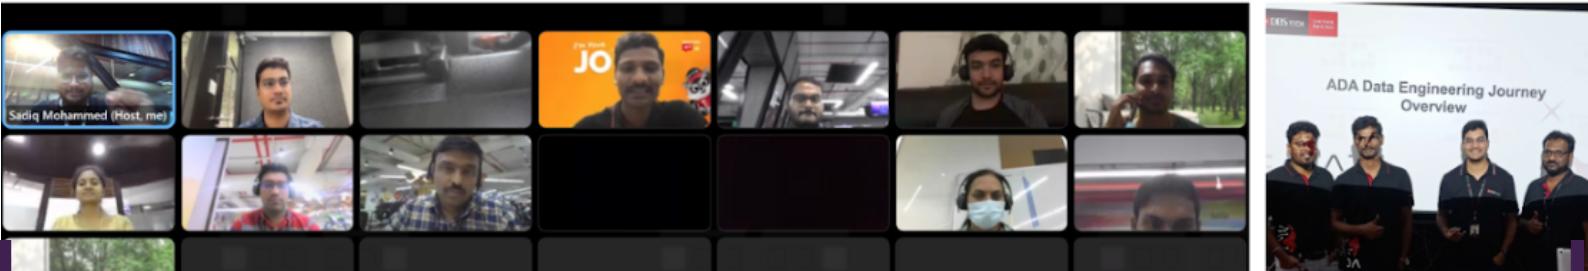

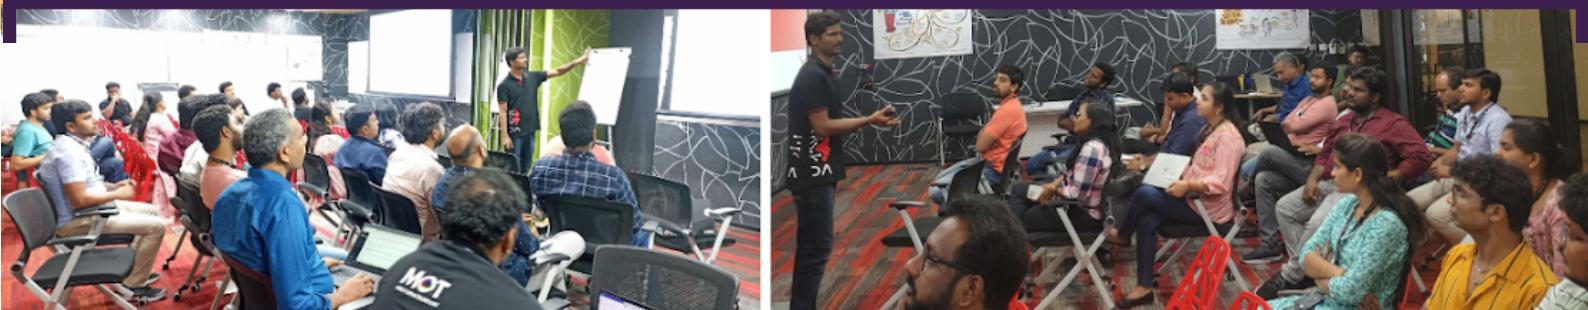

OBJECTIVE

Under the umbrella of the 2023 ADA OKR, specifically within the "Collaboration and Productivity" initiatives, ADA Platform Engineers (from our internal teams) and ADA Platform users (associated with LOBTs externally) will embark on the clear and straightforward user journeys tailored for Data Engineering and Data Scientists.

PURPOSE

.....is to equip our users with a thorough functional and technical comprehension, as well as acquaint them with the latest features and tools of the ADA platform. By guiding users through platform journeys, we enable them to use tools more effectively in their daily tasks, minimise repetitive work, and enhance their overall experience. Additionally, these sessions provide us with a direct channel to engage with our users and LOBTs, fostering better collaboration and building stronger networks.

@Achal, @Khusboo, @Deekshit, @Amruth, @Bhima, @Sagar, @Rajeswari, @Thomas, @Padmini, @Mrinal for your invaluable ADA Data Engineering sessions over three months; your expertise has greatly benefited the ADA community. Kudos to @Deepika, @Sitaram, and @Vijay for your unwavering support and dedication to this initiative.
